

Amira Boubaker

Commercial / Business Developer IT (Profil Ingenieur)

Monastir, Tunisia — +216-24-503-203 — amiraboubakeresprims@gmail.com

Portfolio — LinkedIn — GitHub — LeetCode

Profile

Bac+5 software engineer transitioning to Commercial / Business Developer in IT services. Strong client-facing communication, stakeholder collaboration, and solution-oriented mindset; comfortable translating technical capabilities into business value. Target role: Moneycore (CDI/CDD), immediate availability.

Core Skills

Business Development: Prospecting, qualification, discovery meetings, proposal support, negotiation, relationship management

IT & Payment-Relevant Context: IT services, digital products, web/mobile platforms, APIs, transaction workflows

Strengths: Autonomy, organization, active listening, results orientation, clear communication

Tech Foundation: React Native, ReactJS, Node.js, Symfony 6, REST APIs, MySQL, MongoDB **Languages:** French (fluent), English (professional)

Experience

Software Engineer, ESPITA (Sousse)

Mar 2026 – Present

- Delivered three institutional web applications in coordination with academic and operational stakeholders.
- Translated user/business needs into scoped features and priorities; contributed to AI-enabled self-service improvements.
- Collaborated with internal stakeholders to keep delivery aligned with business goals and deadlines.

React Native Developer, Mobelite (Monastir)

Feb 2025 – Jul 2025

- Delivered JourneyBuddy (50K+ users) and aligned features with product and business expectations.
- Presented capabilities, refined requirements, and managed release cycles for on-time increments.

Software Engineer Student, ESPRIM (Monastir)

Oct 2024 – May 2025

- Built full-stack e-commerce platform (Ktabinet) with inventory and payment workflows.
- Focused on customer journey quality and reliable transaction handling.

Software Engineer Intern, Nexans (Monastir)

Jul 2024 – Sep 2024

- Developed ECTRH, a mobile HR app for employee data and team tracking.
- Automated workflow steps to streamline HR operations and daily team management.

Commercial Highlights

- Client-facing mindset built through delivery work, requirement refinement, and stakeholder coordination.
- Comfortable discussing product value, clarifying needs, and positioning technical solutions in business terms.
- Motivated by targets, ownership, and measurable results in a business development environment.
- Able to bridge technical and business teams to accelerate decision-making and execution.

Selected Projects

Eseac (2026): Full-stack web platform with chatbot and admin dashboard for student/candidate interactions.

JourneyBuddy (2025): AI-assisted travel app (React Native/Node.js/MongoDB), adopted by 50K+ users.

HealthTracker (2025): AI-supported wellness app (React Native/Firebase) for sleep, nutrition, and hydration tracking.

Ktabinet (2025): E-commerce platform with inventory and payment flows designed for online book sales.

Education & Certification

Engineering Degree in Computer Engineering, ESPRIM (Monastir)

Sep 2022 – Jul 2025

Specialization: Software Engineering — Academic Level: Bac+5 equivalent — AI Engineer for Data Scientists (Associate), DataCamp
