

Amira Boubaker

Software Engineer II & Full-Stack Developer

Sousse, Tunisia — +216-24-503-203 — amiraboubakeresprims@gmail.com

Portfolio — LinkedIn — GitHub — LeetCode

Profile

Software Engineer II with full-stack development expertise, specializing in building scalable web applications and e-commerce platforms for customer-facing products. Proven track record delivering solutions that drive user engagement and business growth across education, travel, and retail-commerce domains. Skilled in end-to-end delivery, REST API design, clean architecture, and data-driven features for dynamic digital environments.

Key Skills

Frontend: ReactJS, React Native, TypeScript, JavaScript, Dart, HTML/CSS

Backend: Node.js, Express.js, Symfony 6, .NET, REST APIs, API Design

Databases: MongoDB, MySQL, Firebase, SQL Server, Oracle

Cloud & DevOps: Git, Firebase, Vercel, CI/CD, Docker

E-commerce: Full-stack commerce platforms, Payment integration (Stripe), Inventory management, Order processing, User growth optimization

Tools: Figma, Agile/Scrum, UML, Xcode, VS Code

Experience

Software Engineer II, ESPITA (Sousse)

Mar 2026 – Present

- Designed and delivered three institutional web applications serving thousands of users across ESPITA, ESEAC Sfax, and EMP Sousse.
- Developed AI-powered chatbot assistants to enhance self-service capabilities and improve user engagement through natural language interactions.
- Built scalable, maintainable architectures for mission-critical educational platforms with clean separation of concerns.

React Native Developer, Mobelite (Monastir)

Feb 2025 – Jul 2025

- Delivered JourneyBuddy, an AI-assisted travel application with over 50K active users.
- Integrated maps and AI chatbot technology to deliver personalized recommendations, driving sustained user engagement and retention.
- Architected a modular mobile architecture for scalability, maintainability, and rapid feature evolution across growing user base.
- Managed end-to-end mobile publishing workflow, including APK/AAB generation and distribution.

Software Engineering Intern, ESPRIM (Monastir)

Oct 2024 – May 2025

- Developed Ktabinet, a full-stack e-commerce platform for online book sales with integrated inventory and payment workflows.
- Engineered payment processing (Stripe) and stock management systems using Symfony 6 and MySQL to support end-to-end order fulfillment.

Software Engineering Intern, Nexans (Monastir)

Jul 2024 – Sep 2024

- Built ECTRH, an HR mobile application for employee data management and team tracking.
- Implemented workflow automation to streamline HR operations and daily team management across distributed locations.

Projects

Ktabinet – E-commerce Platform

Symfony 6, MySQL, Stripe API

- Built a full-stack e-commerce platform for online book sales with end-to-end payment and inventory workflows.
- Implemented order processing, stock management, and secure payment integration for a seamless checkout experience.
- GitHub: github.com/amiraboubaker/eseac/

JourneyBuddy – Travel App (50K+ Users)

React Native, Node.js, MongoDB, AI Chatbot

- AI-assisted travel application delivering personalized recommendations to travelers and agencies through conversational UI.

- GitHub: github.com/dghama/journeyBuddy-INT2

ESEAC – Institutional Web Platform

ReactJS, Firebase, AI Chatbot

- Web platform enabling students, applicants, and visitors to interact with institutional content via chatbot or manual interface.
- Includes admin dashboard for managing students, teachers, and applicants.
- GitHub: github.com/amiraboubaker/eseac/

Education & Certification

Certification of Completion: CI/CD Concepts, le bon développeur, Tunisie
Software Engineer Degree, Esprim, Monastir

11 Jul 2026 – 10 Sep 2026
Sep 2022 – Jul 2025
